CENTRAL STATISTICAL OFFICE

Monthly Digest of Statistics

No 345 September 1974 HMSO 85p net

A publication of the Government Statistical Service

Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

The source for further information about series published in this volume is shown at the foot of each table. Current telephone numbers of these sources as well as general information about the *Monthly Digest of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone 01-930 5422 Ext. 602.

Enquiries about orders and subscriptions should be made to the publisher, Her Majesty's Stationery Office, PO Box 569, London SE1 9NH. Telephone 01-928 6977.

Monthly Digest of Statistics

No 345 September 1974

INTRODUCTION

This Digest has been prepared by the Central Statistical Office in collaboration with the Statistics Divisions of Government Departments.

The name of the department or organisation providing the statistics is shown under each table. Some of the statistics provided by departments are actually collected by other organisations such as nationalised boards and trade associations. The assistance provided by these organisations, too numerous to mention individually, is gratefully acknowledged.

The figures in the *Digest* are mainly totals for calendar months or monthly averages.

Some of the figures included in this *Digest* are provisional and may be revised in later issues.

Definitions

A Supplement of Definitions and Explanatory Notes, published with the January issue, gives detailed definitions of all the terms and units used in the Digest. The following general definitions should be noted in using the Digest:

Area covered. Except where otherwise stated, all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Units of measurement.

Ton = long ton of 2,240 lb.

Tonne = 1,000 kilogrammes

Gallon = imperial gallon

Consumption and stocks. The terms 'consumption', 'disposals' and 'stocks' are defined in detail in the Supplement to the Digest. Figures of consumption and stocks are seasonal and should be used with caution. The stocks figures given may often relate to only part of the total stocks in the country.

External trade. Owing to differences in coverage and timing, figures of imports and exports are not always comparable with those for production, consumption and stocks.

Symbols and conventions used

Symbols. The following symbols are used throughout:

- .. not available
- nil or less than half the final digit shown
- * average (or total) of five weeks

Change of basis. A line drawn across a column between two consecutive figures indicates that the figures above and below the line have been compiled on different bases and are not strictly comparable. In each case a footnote explains the difference.

Rounding of figures. In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as shown.

Supplementary tables

Supplementary tables published recently in the *Digest* are listed below, together with the date of issue in which they appeared:

Foreign and coastwise trade of the United Kingdom......April 1974

Projected Total population of the United Kingdom.....July 1974

Change in content

Index of industrial production: This issue of the Digest contains supplementary tables (pages 160–175) on the index of production which give a run of monthly figures from January 1968 to December 1972, in the same industry detail as Table 50.

Increase in price

Owing to increased costs of production the price of *Monthly Digest of Statistics* is raised to 85p net from this issue. The annual subscription will be £12.00 including *Supplement of Definitions* and postage; but annual subscriptions at present in force will be honoured. The price of this publication has remained unchanged since January 1972.

Central Statistical Office, Great George Street, London, SW1P 3AQ

⁽¹⁾ Equals total final expenditure on goods and services at market prices less imports of goods and services less taxes on expenditure plus subsidies. Estimates of the gross domestic product at constant factor cost based on statistics of output are given in Table 3. (1) including a fall in the book value of stocks of £20 million in the second quarter of 1973 reflecting tax rebated on the introduction of VAT; the rebate is also included as a deduction from taxes on expenditure and the estimate of gross domestic product at factor cost is thus not affected. (2) This represents taxes on expenditure less subsidies valued at constant rates. (4) Provisional.

Note: The annual and quarterly estimates include revisions which have not yet been incorporated in Table 52.

(1) Including a fall in the book value of stocks of £280 million reflecting tax rebated on the introduction of VAT. The rebate has been allocated as follows:

Manufacturers 34 Wholesalers Retailers 36

181 Other industries 29

This allocation is approximate, particularly in relation to the asset analysis of manufacturers' stocks.

(3) Provisional.

^(*) Estimates for June 1969(a) are classified according to the Standard Industrial Classification 1958 and are not fully comparable therefore with the estimates for June 1969(b) which are classified on the basis of the Standard Industrial Classification 1968.

Sources: Department of Employment Department of Manpower Services (Northern Ireland)

⁽²⁾ See footnote (1) to Table 16.

^(*) The industries included in the index of production are Orders II-XVIII of the Standard Industrial Classification 1958 and Orders II-XXI of the Standard Industrial Classification 1968.

⁽⁴⁾ Excluding private domestic service.

^(*) The estimates of agriculture are taken from the June censuses of agriculture and exclude a small number of employees of agricultural machinery contractors. It should also be noted that the figures include seasonal and temporary workers.

Note: The Department of Manpower Services (Northern Ireland) has recently issued revised figures for 1971(b) and 1972 and the figures for the United Kingdom have been amended accordingly.

⁽¹) (a) Until 1971 the annual employment statistics were derived mainly from counts of national insurance cards. In 1971 a new system was introduced because of proposals to abolish the use of national insurance cards for employees within the next few years.

(b) The new system relies on returns from employers. In order to provide a link between the old system and the new system, both a card count and a census under the new system were taken in 1971.

See footnotes (2) and (3) on page 19.

Source: Department of Employment

⁽c) The old count of national insurance cards included many employees who work for part of the year only and who would not have been in employment in the particular week in June when the cansus was taken. Mainly for this reason the census figure for June 1971 is considerably lower than the card count. Another difference is that a person who had two regular jobs with different employers in the week of the census was counted twice in the census but only once in the card count, so that the census figures are higher than the card count in some industries and services where secondary employment is common.

Total civil and defence departments	700-8	700-1	690-4	692-7	700-2	693-3	695-1	694-4	692-1	690-3
Males	476-7	473-2	463-6	463-6	465-9(*)	460-8	459-7	456-5	451-4	447-3
Fernales	224-1	226-9	226-8	229-1	234-2	232-5	235-4	237-9	240-7	234-0

Note: Figures have been rounded independently, thus there may be an apparent slight discrepancy between the sum of the constituent items and the total.

- (*) The figures include established and unestablished non-industrial and industrial staff but exclude casual or seasonal staff (recruited for periods of normally less than six months) and employees of the Northern Ireland
- Government. Two part-time employees are counted as one whole-time employee.

 (2) The figures prior to 1 July 1972 have been adjusted to show staff in current Ministerial areas so that the figures in all columns are on a comparable basis.
- (3) Excluding headquarters staff, but including research and development establishments and Royal Ordnance
- (4) From 1 April 1974 Royal Ordnance Factories are shown separately.
- (*) These figures include estimated breakdown of certain staff recently transferred to Ministry of Defence and may be subject to later amendment.

⁽¹⁾ Excludes farmers, partners and directors.

Sources: Agricultural Departments

⁽²⁾ Because of changes in the census categories in England and Wales in 1970 and 1972 numbers returned for earlier years are not comparable with those for the most recent years.

⁽a) Includes regular part-time workers.

⁽⁴⁾ Whole-time workers only.
(8) Includes estimated figures for Scotland.

Note: This table has been revised and is now based on information from the Census of Employment (see footnote (*) to Table 16). The estimates are not comparable with estimates prior to June 1971 which were

(*) Count brought forward because of Easter holidays.

Source: Department of Employment

based on mid-year counts of national insurance cards.

(*) Orders III—XIX of the Standard Industrial Classification 1968.

(*) Prior to June 1974 (a) figures relate to establishments with more than 10 employees in all manufacturing industries except shipbuilding and ship repairing.

(*) Prior to June 1974 (a) maintenance staff are excluded.

⁽⁴⁾ Operatives stood off for the whole week are assumed to have been on short-time to the extent of 40 hours

^(*) In February 1972, and again in January, February and March 1974, the volume of overtime and short-time was affected by the energy crisis.

^(*) Figures after June 1973 are provisional and are subject to revision when the results of the 1974 Census of Employment are available.

^(*) In June 1974 a new sampling system was introduced for the monthly employment returns. At the same time revisions have been made in the method of calculating overtime and short-time. Figures for June 1974 are still provisional but have been calculated on both the old and new basis. Thus, up to and including June 1974 (a) the figures have related to operatives at establishments with over 10 employees in all manufacturing industries except shipbuilding and ship-repairing but have excluded overtime worked by maintenance workers. The new series from June 1974 (b) relates to all operatives in manufacturing industries including shipbuilding and ship-repairing, and overtime worked by maintenance workers is included.

Note: The presentation of unemployment statistics in this and succeeding tables is on the lines recommended by an Inter-Departmental Working Party Unemployment Statistics (Cmnd. 5157). See Department of Employment Gazette, November 1972.

Sources: Department of Employment Department of Manpower Services (Northern Ireland)

^(*) The figures in this table are adjusted to take into account amendments notified on the four days following the date of the count. Figures for married females from May 1972 onwards are not adjusted.

^(*) The base used in calculating the percentage rate of unemployment is the estimate of total employees (employed and unemployed). The latest figure available is that for mid-1973.

Unemployed('), excluding tends beyolgment on students: industrial analysis

2.6

2.7

(*) The base used in calculating the percentage rate of unemployment is the estimate of total employees (employed and unemployed). The latest figure available is that for mid-1973.

Source: Department of Employment

^(*) Including ex-service men and women and other unemployed persons aged 18 years and over not classified to an industry. Unemployed school-leavers (i.e. persons under 18 not in full-time education who have not yet taken up employment) and adult students seeking temporary employment during vacation are excluded. The All industries figures are adjusted to take into account amendments notified on the four days following the date of the count. All other figures from May 1972 are not so adjusted.

See Note to Table 21.

(*) The total unemployment is adjusted to take into account amendments notified on the four days following the date of the count. The analyses by duration from May 1972 onwards are not adjusted. Prior to May 1972, casuals were excluded from this analysis. See Department of Employment Gazette, June 1972.

(*) Because of the energy crisis the detailed information about duration of unemployment was not collected in these

months.

^(*) Excludes stoppages involving fewer than 10 workers or lasting less than one day except any in which the total number of working days lost exceeded 100. The figures for 1974 are provisional.

(2) From January 1970 the analysis by industries is based on the Standard Industrial Classification 1968. Figures prior to that date are based on the Standard Industrial Classification 1958.

⁽³⁾ Where stoppages extend over more than one month, the workers involved are counted in the month in which

they first participated.

(4) The figures of working days lost relate to the total working days lost within each of the periods shown as a result of stoppages in progress in that period, whether the stoppages began in that period or earlier.

(*) Figures for individual months are averages of the four or five weeks ending on the last Tuesday of each month.
(*) Invalidity benefit was introduced on 23 September 1971. (*) Including prescribed industrial disease.
(*) Excluding claims made under the emergency benefit procedure. Figures for individual months are averages of the four or five weeks starting on the first Monday of each month.

(*) These figures include substantial numbers of persons who have been sick for a long time and who may no longer

be in employment.

(*) Up to May 1973, these estimates are based on a standing sample of claimants. Subsequent figures are provisional estimates derived from the numbers of new claims and will be replaced later by final estimates from the sample. Yearly figures are averages of twelve monthly figures. (*) Yearly figures are averages of quarterly figures. Quarterly figures relate to the first Monday in February, May,

August and November.

(*) Including pensioners in receipt of Old person's retirement pension awarded under National Insurance Acts 1970 and 1971.

(*) Including a diminishing number of widows with pensions of 30s a week derived from the old Contributory Pensions Acts. (**) Figures for 1973 are provisional.
(**) Including the elder or eldest child for whom no allowance is payable.
* Average of five weeks.

(*) In June 1970 the census was extended in Great Britain to cover all holdings with significant output (26 standard

Sources: Agricultural Departments

man-days or more) including those on one acre or less of agricultural land (previously excluded); at the same time about 16,000 holdings in Scotland with negligible output were excluded from the census. In Northern Ireland figures up to 1972 relate to holdings of one acre or more, except for numbers of livestock, which were collected from all owners, irrespective of the size of the holding, as well as from landless stockholders. As from June 1973 the threshold five for inclusion in the census was raised from 26 to 40 standard man-days in Great Britain, excluding from the census about 3,000 holdings on 18,000 acres of land in England and Wales and nearly 5,000 holdings on 167,000 acres in Scotland. At Britain, excluding from the census about 3,000 holdings on 18,000 acres of land in England and Wales and nearly 5,000 holdings on 167,000 acres in Scotland. At the same time the 40 man-day concept was introduced in Northern Ireland resulting in the elimination from the census of some 8,000 statistically insignificant holdings on 40,000 acres of land and the inclusion of 2,000 or so holdings previously excluded (except to the extent of obtaining estimates of numbers of livestock on them) because they had less than one acre of land. The United Kingdom figures now relate to all known holdings with 40 standard man-days or more; in England and Northern Ireland holdings with less than 40 standard man-days are included only if they have 10 acres or more of crops and grass or at least one regular whole-time worker. (*) Excludes Scotland. (*) Includes maize for threshing in England and Wales. (*) Weight in pods. (*) Shelled weight. (*) Includes vegetables grown under glass. (*) England and Wales only. (*) Clover and rotation grasses including lucerne in England and Wales. (*) Production figures relate to hay only. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed: the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying. (**) Includes hay from lucerne in England and Wales and from permanent grass in Scotland. (**) Includes the total area of deer forest land in Scotland. land in Scotland.

^(*) A small quantity of molasses spirit is used in beverage spirit production. See explanation hotes in the Supplement to Table 74. (*) The sub-headings indicate the description of the spirits at the time of duty payment. (*) On 1 July 1973, as part of the first stage of progression towards adoption of the Common Customs Tariff, separate rates of duty were introduced for wine imported from the EEC. This included an agreement whereby a quota of Portuguese heavy wine is admitted at EEC rates of duty, the remainder bearing the full rate. Quantities of wine from non-EEC countries on which duty has been paid at EEC rates under quota arrangements will appear under EEC rate. Comparability with figures formerly shown under Other rates can be schieved by summing the quantities now shown as EEC rates and Other rates. (*) From July 1973 separate information of clearance in bottle is not available for wine at other rates of duty. (*) Provisional.

(2) Quarterly estimates are derived as averages of the monthly figures.
 (3) In the absence of earnings data for February 1972 due to the effects of the coalmining dispute no index of wages and salaries per unit of output has been calculated for that month. The indices calculated for January and March 1972 are less reliable than usual.

⁽¹⁾ Because of the coal miners' strike which began 9 January 1972, the statistics are incomplete.

^(*) An overtime ban by mineworkers started on 12 November 1973, followed by a national strike on 10 February 1974. Normal working was resumed on 11 March.

^{*}Average of five weeks.

⁽¹) From January 1971, figures relate to sales by manufacturers in Great Britain employing 25 or more persons, and who are classified to MLH 274 (paint). The figures also include sales of principal products of this industry by establishments classified to MLH 271 (general chemicals) and MLH 494/1 and 2 (toys, games and children's carriages).
From third quarter 1971, the figures relate to sales by manufacturers in the United Kingdom.

^(*) Industrial ethyl alcohol is distilled from molasses or derived from other processes: the current usings of molasses spirit in beverage spirit production are believed to be comparable with the usings in the preceding financial year—see explanatory notes.

Sources: HM Customs and Excise Department of Industry

Interceal year—see explanatory notes.

(2) From July 1971 figures relate to sales by manufacturers in the United Kingdom employing 25 or more persons and who are classified as MLH 275 (soap and detergents). The figures also include sales of synthetic detergents by establishments classified to MLH 271 (general chemicals), MLH 272 (pharmaceutical chemicals and preparations) and MLH 2791 (polishes).

(2) A short standard is 7,200 matches.

^(*) At steel works and steel foundries. (*) At steel works, steel foundries and blast furnaces.
(*) Stocks at producers' works of ingots, semi-finished and finished steel in terms of ingot equivalent. From March 1970 and March 1973 the figures are revised due to re-measurement.

⁽⁴⁾ From January 1971, figures include stock of semi-finished steel for the manufacture of heavy products

previously not reported.

(*) The figures for 1970 onwards include deliveries of welded tubes over 16 inch outer diameter.

(*) 53 week period. (*) Revised figure. This figure was incorrectly stated in the August issue.

* Average of five weeks.

Supplies and deliveries of steel

⁽¹⁾ Including chassis delivered as such by manufacturers. The value of deliveries of commercial vehicles is shown in Table 86.

⁽a) Beginning in 1973 the headings under which data are collected were changed. The new heading of Car derivatives (i.e. vans derived from car chassis) has virtually the same coverage as the heading it replaced, Commercial vehicles not over 1½ tons. Although not all commercial vehicles under 1½ tons gross vehicle weight are classed as car derivatives and it is also possible for car derivatives to exceed 1½ tons gross vehicle weight, the difference between the two categories is small as far as UK production is concerned. The series as given may therefore be regarded as sufficiently continuous for the analysis of trends. The combination of the two series, car derivatives and commercial vehicles under 10 tons gross vehicle weight is identical in coverage with the sum of the two series that have been superseded.

⁽³⁾ Complete and chassis.

^{(*) 53} week period.

^{*} Five week period.

Merchant shipbuilding(1): tankers of 300 gross tons and over(2)

(¹) includes naval vessels registered as merchant ships.
(²) Gross tonnage (100 cubic feet per g. t.) is the total volume of all the enclosed spaces of a vessel.
(²) The total tonnage specified on ordering vessels differs slightly from the total actual measured tonnage on

completion.

(4) Vessels are shown for export if they are for other than UK registration.

(5) Modifications include alterations of 500 gross tons or more to the tonnage and the country of registration of vessels already on order

(6) Modifications and cancellations exceed new orders for the period.

(*) Spinning, doubling processing and weaving parts of the cotton industry, plus man-made fibre, wool, carpets and hosiery industries. (*) These indices have been adjusted to allow for the differences in the lengths of calendar months but not for holidays or for other seasonal variations. (*) The monthly provisional index numbers for individual sectors relate to the total output of manufacturers whose main business is in that sector of the industry. These are subsequently revised in the light of sales figures of the principal products of each clothing sector as reported in the quarterly sales inquiries.

(¹) The coverage of the inquiry from which this table is compiled was extended at the end of 1970 and the earlier figures have been adjusted to provide a broadly comparable series. It must be emphasised, however, that the conversions have been based on linking factors spanning the 4th quarter 1970 and 1st quarter 1971 only and they should be treated with caution.

⁽¹⁾ Excluding carpets, matting and underlays and rubber or cork floorings.

those for earlier periods. A link between the two sets of figures is shown in the March 1972 edition of *Business Monitor*, P. 9, Carpets.

(*) Prior to the 3rd quarter 1971 these figures relate to woven carpets faced with more than 50 per cent of man-made fibres.

(*) Prior to the 3rd quarter 1971 export figures are those reported directly by manufacturers. From that date they are those recorded in the Overseas Trade Statistics.

(*) Figures for labour employed by contractors are shown in Table 19.

(*) Figures include repair and maintenance, direct labour of public sector and estimates of unrecorded output by small firms and self-employed workers.

(?) Output of operatives employed directly by government departments, local authorities and certain other public authorities on construction work, excluding gas, water and electricity undertakings.

^(*) Excluding building which is wholly financed from private sources. (a) From January 1960 for Scotland and from April 1960 for England and Wales the cost of school meals projects has not been separately recorded. The value of such projects, shown separately for the years 1946 to 1959 in previous tables of educational building, has been included as appropriate under the headings Primary and secondary and Special schools. (a) Totals for England and Wales include the value of certain projects for which no analysis between type of project is available. As from October 1961, the individual value of such projects is less than £2,000. (b) Figures for England and Wales include the value of projects for which specific approval is not required. (b) Figures for England and Wales relate to project values and those for Scotland to contract values. Figures for Scotland include the cost of certain main projects for which specific approval is not required. (c) The Scotlish figures of Under construction and Completions are based on the tender costs. The Under construction and Completions figures exclude the value of approved school projects which in 1969 amounted to £1,246,000 and £406,000 respectively.

^(*) The method of calculation of the number of new places provided differs in England and Wales and Scotland. In England and Wales the figures refer to the number of pupils for which new school accommodation is designed. In Scotland the figures refer to the sum of the approved capacities of all the teaching rooms whether classrooms or practical rooms, and will normally exceed the number of pupils for which accommodation is designed.

(2) Including new schools brought into partial use before completion.

(3) Extensions, alterations, remodelling and war damage repairs.

^(*) Passenger journey figures are not strictly comparable owing to the transfer from British Rail to London Transport railways of the London Bow to Upminster line on 1 January 1969 as well as the London Paddington to Westbourne Park service on 1 January 1970. In addition, the new 14 mile Victoria Line was opened to traffic by London Transport in four stages on 1 September and 1 December 1968, 7 March 1969 and 23 July 1971. (*) The four-weekly averages for each year are computed from calendar year totals.

^(*) Statistics of visible trade on a balance of payments basis are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the Overseas Trade Statistics. These adjustments are summarised in Table 122 above; they are described in detail in United Kingdom Balance of Payments 1963–1973.
(*) Export unit value as a percentage of the import unit value Index. (2) Export unit value as a percentage of the import unit value Index.
(4) Provisional.

⁽²⁾ Including adjustments for arrivals of and payments for United States military aricraft, etc.

⁽³⁾ Affected by the dock strike.

⁽⁴⁾ Provisional.

(1) The total currency flow, together with Allocation of Special Drawing Rights. (2) From July 1972 transactions with IMF affecting the United Kingdom reserve position in the Fund are included as changes in the official reserves. (2) From 23 August 1971, valued in sterling at transactions rates of exchange. Therefore, from the third quarter of 1971 the sterling valuations of the flow does not equal the difference between the opening and closing levels which are converted at parity in Table 143.

(¹) Figures are calculated to end-September 1971 at \$2.40 = £1, from end-December 1971 to end-January 1973 at \$2.6057 = £1 and from end-February 1973 at \$2.89524 = £1. (²) Drawings from the IMF, net of repayments by the United Kingdom and drawings of sterling from the IMF by other countries. From July 1972 excludes transactions affecting the United Kingdom gold tranche. (²) Borrowing from other monetary authorities, and a consortium of Swiss banks in 1967, in the form of foreign currency deposits or assistance with a sterling counterpart. (*) From July 1972, the official reserves were redefined to include the reserve position in the IMF. From end-April to end-June 1972, this stood at £292 million.

(*) In addition to its lending, the National Loans Fund meets the interest and management charges of the National Debt. To the extent that these charges are not matched by interest received on its own lending and by profits of the Issue Department of the Bank of England, the Consolidated Fund meets the difference. The surplus on the Consolidated Fund is paid to the Fund, leaving the difference between that and its net lending as the Fund's financing requirement. (*) Loans under the Ship Credit Scheme and to the Shipbuilding dustry Board, housing associations and building societies. (*) Loans to Votes for US military aircraft, Town and Country Planning compensation, Redundancy Fund and lending to Northern Ireland Exchequer.

September								

⁽¹⁾ This is equal to Exchequer borrowing and special transactions (net) less receipts from extra-Exchequer funds, etc. It is also equal to the amount the central government borrows less any increase (or plus any decrease) in its official reserves.

(2) A negative item represents a surplus, a positive item a deficit.

Sources: HM Treasury Central Statistical Office

⁽³⁾ Including in March of each year transfer of surplus of the death duties surrendered securities account.

^(*) The cumulative monthly figures do not agree precisely with the quarterly figures because of adjustments, incorporated in the latter, for accrued interest on National Savings and for issued coin.

(*) Excluding borrowing from the National Loans Fund.

(*) Adjustment for redemption of government guaranteed stock.

^(*) Consolidated Fund liability for service of the National Debt: balance carried over until March.

(1) Average of figures on Wednesdays.

Sources: Bank of England Bankers' Clearing House

^(*) Months: average of figures on Saturdays in consecutive four-week periods as published in The London Gazette or in The Belfast Gazette, with as close a correspondence as possible to the calendar months. Years: average of the thirteen published figures.
(*) Total notes and coin outstanding, less notes and coin held by the Bank of England, Banking Department,

and by the London and Scottish clearing banks and Northern Ireland banks.
(*) From 1 July 1969 all bank clearings are worked on a 5 day week.

^(*) Not comparable with earlier figures owing to mergers among the London clearing banks. See Supplement of Definitions and Explanatory Notes.

(*) Not comparable with earlier figures owing to the exclusion of credit transfers processed by Bankers'

Automated Clearing Services.

⁽¹⁾ In Northern Ireland included in Other manufacturing.

^(*) The annual figures are averages of the figures for February, May, August and November, except for the Northern Ireland figures for 1970, which comprise the February figures only.
(*) Because of difficulties of classification it is not possible, before November 1973, to include advances made by the six finance houses recognised or confirmed as banks in January 1972 or January 1973. Advances by five finance houses totalled at mid-February 1973 and by all six £1,711 million at mid-May and £1,894 million at mid-August.
(*) The average for 1972 is calculated after adding to the Sebruary figures the adjustment (total £926 million) in May 1973 has presented as the section conditions on the proposed as the section of t

¹⁹⁷² transfering certain credits from bills to advances.

(*) Excluding banks in Northern Ireland. The average for October to December 1973 (the base period for the supplementary deposit scheme) was £20,591 million. (*) Minimum 12-5 per cent (*) Virtually all interest bearing. (*) Minimum 10 per cent. (*) Supplementary deposits are paid by banks and deposit-taking finance houses, according to growth in excess of the guideline, at rates of 5 per cent (up to 1 per cent excess), 25 per cent (over 1 up to 3 per cent) and 50 per cent (above 3 per cent) of interest bearing eligible liabilities. (*) Broadly speaking, private sector debt. (*) Maximum 20 per cent. The capital resources base for the calculation of the multiple in 1974 is 96. (*) The rates shown apply to all banks, other than those in Northern Ireland and finance houses.

(*) Derived from yield-maturity curves fitted mathematically. The break shows a change in the method: an article in the Bank of England Quarterly Bulletin December 1972 describes the new method of calculating the curve which is now based on the prices and coupons for all stocks except a few with special features. Before 1971, the curve was fitted to yields on stocks with coupons of 5 per cent or more. (The old method was described in the March 1967 Bulletin). The yearly figures are averages of end of month yields. The monthly figures relate to averages of Wednesdays, except for 1971, where they are for end-months. Figures have been revised from January 1973. See article in the Bank of England Quarterly Bulletin September 1973.

(a) Average of working days, based on the mean of the middle opening and middle closing prices each day, excluding gross accrued interest; tax is ignored. (b) Averages of daily figures calculated from middle market closing prices. (c) Gross redemption yields of 15 stocks so combined as to give a yield average for a constant 20-year term.

^(*) The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the months indicated. Administrative and clerical workers and other salaried persons have been excluded. Certain qualifications are given in a full account of the enquiry relating to October 1973,

published in the Department of Employment Gazette for February 1974.

(2) From and including October 1967 includes (a) dock workers previously on daily or half daily engagements and (b) postmen.

(3) This index relates only to the industries covered by the earnings enquiry. It should not be confused with the figures in Table 167 which cover all industries.

^(*) England and Wales only. (*) Except sea transport and postal services. (*) Consisting of laundries and dry cleaning, motor repairers and garages and the repair of boots and shoes. (*) For notes on the index classified according to Standard Industrial Classification 1988, see pages 470–471 of the Employment and Productivity Gazette for May 1970. (*) Because of the disputes in coal mining a reliable index for Mining and quarrying cannot be calculated for these months. In each case the figures for coal mining for a month sarlier have been used in the compilation of the index for All industries and services covered.

Index of average earnings of all employees (monthly enquiry)

^(*) The figures reflect temporary reductions in earnings while three day working and other restrictions were in operation during January and February 1974. (*) Provisional. (*) Insufficient information is available to enable a reliable index for Agriculture to be calculated for the current month but the best possible estimate has been used in the compilation of the index for All industries and services covered.

Average weekly earnings of manual workers in certain industries(1)

⁽¹⁾ The figures are based upon changes in basic rates of wages or minimum entitlements and reductions in normal weekly hours, which are normally determined by national collective agreements or statutory wages regulation orders. The information relates to the end of the month and, where necessary, the figures may be revised to take account of any changes having retrospective effect or reported belatedly. A brief note on the method of compilation of the figures is given in the current issue of the *Department of Employment Gazette*.

⁽a) In general, males under 21 and females under 18 years of age.
(b) The term Manufacturing industries covers all industries included in Orders III–XIX of the Standard Industrial Classification 1968.

Index numbers of basic weekly rates of all manual workers(')

			1									

(*) The figures relate to changes in basic full-time weekly rates of wages or minimum entitlements and do not reflect reductions in normal weekly hours without loss of pay or variations in actual earnings arising from such factors as overtime or lost time. The changes included are those determined by national collective agreements or by statutory wages councils or boards.

(3) The monthly totals in the columns headed increase and Decrease relate to the number of workpeople affected by changes and the corresponding gross amounts. Workpeople affected by two or more changes are counted only once in the annual totals which relate to the number having increases only or for whom increases exceeded decreases, the number having decreases only or for whom decreases exceeded increases, and the corresponding net amounts; the column headed Net increases, is therefore the overall net increase for the year.

(3) The annual totals of net increases in basic weekly rates of wages mean that the total wage bill of the country, in the industries and for the workpeople covered by the statistics, for a full ordinary week's work at basic rates of wages at the end of any one year exceeds that for the corresponding week of the preceding year by the amount stated. The average weekly wages paid during any one year will not, however, exceed those paid during the preceding year by this sum, as the actual changes will have taken place at various dates during the year.

General index of retail prices

	All items	All items except items of food whose prices show significant seasonal variations	Food	Alcoholic drink	Tobacco	Housing	Fuel and light	Durable house- hold goods	Clothing and foot- wear	Trans- port and vehicles	Miscel- laneous goods	Services	Meals bought and con sumed outside the home (1)

September 17	1												

^(*) The Cost of Living Advisory Committee (now renamed the Retail Prices Index Advisory Committee) recommended in 1962 that until a satisfactory index series based on actual prices became available half the expenditure on meals out should continue to be allocated to the food group and the other half spread proportionately over all groups, including the food group. The index for meals out for 16 January 1968 implicit in this recommendation was 121-4. Since January 1968 an index series based on actual prices has been available and indices in this series have been linked with the implicit index for meals out for 16 January 1968, to obtain indices for meals out with 16 January 1962 taken as 100.

General index of retail prices(1)

⁽¹⁾ Index numbers have been revised back to January 1974 to allow for the recently finalised

Department of Industry

^(*) Index numbers have been revised back to January 1974 to allow for the recently interest participation agreements for crude oil payments.

(*) Index of building costs: figures relate to average for the quarter.

(*) The index covers only dwellings on which building societies have advanced mortgages during the period. The cost of land is included. Figures relate to average for the quarter.

Index numbers of wholesale prices

^(*) Reductions in the VAT-exclusive prices of alcoholic liquor, tobacco and cigarettes, matches and mechanical lighters took place in April. These reductions resulted from lower revenue duties designed to offset additional tax revenue from VAT. With unchanged prices in April for these products index numbers for months from April onwards would have been higher by the following: all manufactured products 1-7; chemicals and allied industries 0-2; products of manufacturing industries other than food, drink and tobacco and engineering and allied industries by less than 0-05.

(*) Provisional.

(*) Based on manufacturers' list prices.
(*) The market-price series are based on prices before the addition of subsidies when paid to producers under the Cereals Deficiency Payments Scheme and Fatstock Guarantee Scheme.

(2) The gross-price series for wheat, cattle and pigs are based on prices after the addition of subsidies when paid to producers; that for milk on prices paid to producers by the marketing board and that for potatoes on producer prices, sometimes supported by the Potato Marketing Board.

(4) Maincrop potatoes only.

(*) Based on net prices to farmers after deduction of subsidy. (*) Provisional.

Source: Ministry of Agriculture, Fisheries and Food

^(*) Based on BEMB prices to producers under the Egg Contract Schemes until March 1970. From April 1970 until March 1971 based on guaranteed minimum prices to producers at packing stations and thereafter on average price paid to producers at packing stations.

CENTRAL STATISTICAL OFFICE

Input-output tables for the United Kingdom 1970

This publication can be used to examine many aspects of the industrial structure of the UK economy.

Tables divide the economy into 90 separate industries. Figures are given for each industry which show the extent to which, both directly and indirectly, it depends for its purchases on other industries. And likewise the extent to which it depends for its sales on other industries, on personal and public consumption, and on investment and exports.

The tables in the book include industry × industry and conmodity × commodity tables, an imports matrix and an analysis of final demand by commodity group and by function.

These latest tables update the information contained in the tables for 1968, which were published last year as Studies in Official Statistics No. 22; this also included descriptions of the construction and uses of input-output tables.

Input-output analysis is of increasing importance to economists, planners and marketing managers in industry, as well as to academic and government economists and statisticians.

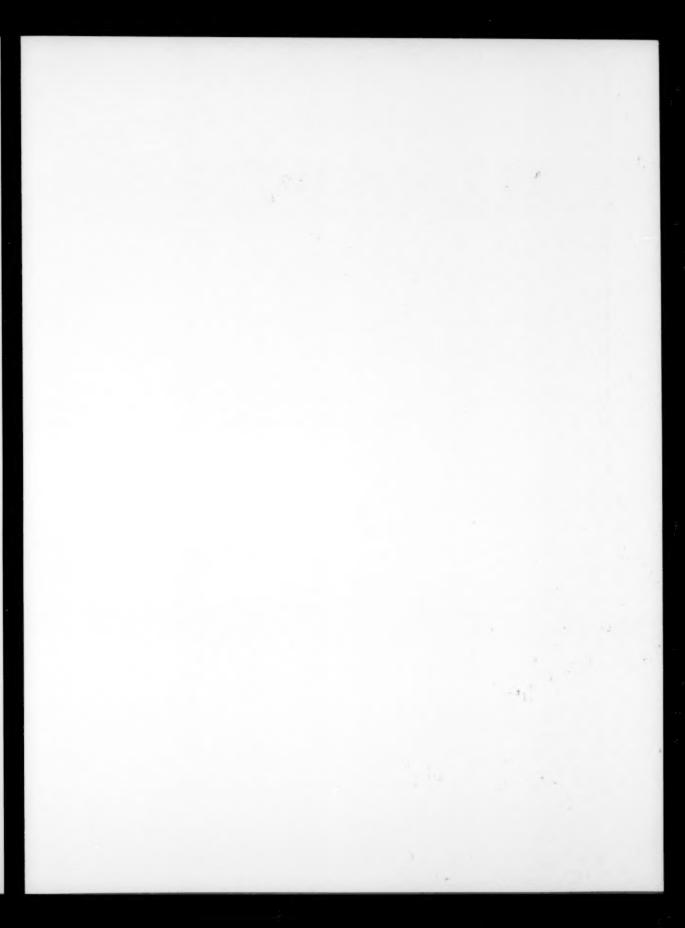

Input-output tables for the United Kingdom 1970 is published in the Business Monitor series, reference number PA1004.
